# Marine, Estuarine, Environmental Science Graduate Program

Phone: 301-405-6938 | Email: [mees@umd.edu](mailto:mees@umd.edu) | Rm. 1213 HJ Patterson Building College Park, MD 20742 |

## Mission Statement

Marine Estuarine Environmental Sciences (MEES) is an interdisciplinary, inter-institutional, statewide graduate program within the University System of Maryland (USM) whose mission is to educate students to become the scientific leaders and problem-solvers of the future. Using an interdisciplinary approach, we train students to engage in scientific discovery, integration, and application to generate new knowledge and to solve environmental problems.

## Program Overview

Established in 1978, the MEES Graduate Program is one of the largest environmental graduate programs in the University of Maryland System with approximately 200 faculty members drawn from experts from government and non-government agencies and 5 universities and two research institutions including: the University of Maryland, Baltimore (UMB), the University of Maryland, Baltimore County (UMBC), the University of Maryland, College Park (UMCP), the University of Maryland, Eastern Shore (UMES), and the University of Maryland Center of Environment Science (UMCES).

**MEES offers masters (M.S.) and doctoral (Ph.D.) degrees in four Foundations: Environment, Health & Society, Earth & Ocean Science, Ecological Systems, and Environmental Molecular Science & Technology.**
